

KARINA MAYSA AMANDA

Program C++ - Operasi Array

File: KARINA MAYSA AMANDA_11-11.cpp

Source Code:

```
#include <cstdlib>
#include <iostream>
using namespace std;
int main()
{
    //mendeklarasikan array dan variabel
    int array1 [5] = {7, 6, 9, 1, 16} ;
    int array2 [5] ;
    int tambah, kurang, kali;
    //memberikan nilai beberapa elemen array 2
    array2[0] = 2;
    array2[1] = 3;
    array2[2] = 4;
    //membuat persamaan Matematika
    tambah = array1[2] + array2[0] ;
    kurang = array1[3] - array2[1] ;
    kali = array1[4] * array2[2] ;
    //Menetapkan hasil persamaan
    cout << "Array1 [2] + Array2[0] = " << tambah << endl;
    cout << "Array1 [3] - Array2[1] = " << kurang << endl;
    cout << "Array1 [4]* Array2[2] = " << kali << endl;
    system ("PAUSE") ;
    return 0;
}
```
